muhammad-mustafa-946346304 | Mustafa25008

SUMMARY

Motivated Computer Science graduate with practical experience in manual software testing through academic projects. Demonstrated ability to create functional test cases and execute tests. Strong understanding of SQA principles, black-box testing, functional/non-functional testing, and SDLC. Eager to contribute to quality assurance teams and grow within the software testing domain.

TECHNICAL SKILLS

Technical Skills

- Python, SQL, C#.NET, Tkinter, SQL Server, SSMS, Microsoft Excel, Microsoft Word

Testing Skills:

- Manual Testing (Functional, Black/White Box), Test Case Design, STLC, Requirements Analysis

Soft Skills:

- Analytical Thinking, Problem Solving, Communication, Documentation

Concepts:

- OOP, SDLC, Database Design

EDUCATION

Bachelor of Science in Computer Science — **Dec 2021 – May 2025**

University of Engineering and Technology, Lahore

FCS (Pre-Engineering) — **Sep 2019 – July 2021**

Punjab Group of Colleges, Lahore

WORK EXPERIENCE

Computer Science Instructor — **Aug 2023 - Feb 2024**

- Taught programming, data structures, and software concepts to ICS students
- Emphasized logic building, debugging, and structured thinking
- Developed teaching material aligned with industry-standard practices

PROJECTS

E-commerce InsightPro – AI-Powered Customer Analytics Platform

- Manually test all modules and Applied Black-box/White-box manual testing and created Test Tables

Learning Management System

- Performed input validation and data integrity tests
- Validated result upload and student tracking features manually

Gmail-like Desktop App

- Manually verified email sending/ receiving, label management, and database integration

Library Management System

- Created and executed test cases for user login, and database interactions
- Tested using Python and SQL Server backend
